I Claim:

- Nasal drip control devices which when placed on the pressure points
 of the nose, control or cause the cessation of the nasal production of
 mucus, comprising a plastic coated wire or an adhesive coated plastic
 strip.
- 2. The nasal drip control device of claim 1, which has plastic balls on the ends.
- 3. The nasal devices of claim 1 are a half-inch to an inch in length.
- 4. Nasal drip control device holder as shown in Figure IV to be held in the hand.
- 5. A sneeze stopper device that fits over the nose and has curved ends which fit on the nasal pressure points.
